FEMA-4795-NM
FEMA-4843-NM

Narratives

Disaster Damage:

The State of New Mexico experienced two federally declared disasters in 2024. DR-4795 was declared on June 20, 2024, in response to the South Fork Fire, Salt Fire, and subsequent flood events, and DR-4843 was declared on November 1, 2024, in response to a severe storm and flood event in Chaves County.

On June 17, 2024, the South Fork Fire started in Lincoln County and burned over 33,000 acres, simultaneously, the Salt Fire ignited on Mescalero Apache Tribal land, burning more than 7,000 acres. The fires developed in a parallel pattern that overwhelmed communities nearby, and resulted in the loss of several hundred homes, businesses, and multiple points of critical infrastructure. The destruction of vegetation and soil stability resulted in high susceptibility to post-fire flooding and debris flows, and proceeding New Mexico monsoonal rains triggered flash floods statewide, with especially severe impacts in burn scar areas. Floods inflicted severe damage on roads, bridges, water infrastructure, and homes. Similar impacts are expected to be ongoing during the annual monsoon season for at least the next five years as the wat

On October 30, 2024, a slow-moving low-pressure system became stationary and unleashed 5.76 inches of rain—nearly half a year's worth of precipitation—in a single weekend. The event resulted in New Mexico's second federally declared disaster in 2024, with heavily concentrated impacts in Chaves County. The storm resulted in several feet of water overwhelming local drainage systems and causing a massive city-wide flood in Roswell, as well as several communities downstream including Hagerman, Dexter, and Lake Arthur, where vehicles were swept into buildings, bridges, and other public infrastructure, and homes were filled with upwards of four feet of water.

For both disasters, DHSEM quickly mounted a response and recovery effort to provide time-sensitive assistance in service to impacted residents and local governments. HUD designated two counties as "most impacted and distressed," which are Lincoln County (in DR-4795, and Chaves County (in DR-4843.

Recovery Needs:

The UNA evaluates the best available data in four sections: housing, infrastructure, economic revitalization, and planning/capacity building. A summary of total unmet needs by category is provided in Table below.

Table: Summary of Total Identified Unmet Needs Recovery Category Assessed Unmet Needs

Recovery Category	Assessed Unmet Needs
Housing	$90,729,570.02
Infrastructure	$153,013,472.46
Economic Revitalization	$61,599,626.08
Planning and Capacity Building	$12,000,000.00
Total Estimated Unmet Needs	$325,342,878.48

HUD designated two counties as "most impacted and distressed" (MID) in the allocation for the State of New Mexico: Lincoln County, for impacts resulting from DR-4795; and Chaves County, for impacts resulting from DR-4843. The State of New Mexico is required to spend a minimum of 80% of program funding in these two counties due to their MID designation.

In addition to Lincoln County and Chaves County, the State of New Mexico has designated all other FEMA-declared counties for the DR-4795 and DR-4843 as Standardized "most impacted and distressed areas." While total damage estimates are not as high in these areas, there was significant damage to acequias and other aspects of rural infrastructure which may require infrastructure assistance through the CDBG-DR program. This adds San Juan County, Rio Arriba County, Otero County, and Mescalero Apache Tribe as areas eligible to receive funding. These areas may receive up to 20% of the programmatic funding available through CDB

A full summary of the FEMA declaration statuses and total reported damage via Individual Assistance Public Assistance is provided in Table below.

Table: Impacts Summarized by County

County	FEMA Declaration	FEMA Reported Infrastructure Damage (Public Assistance)	FEMA Reported Verified Loss (Individual Assistance)	Total FEMA Reported Damage
Lincoln County	Individual Assistance and Public Assistance (A-G)	$153,644,827.04	$23,087,992.03	$176,857,819.07
Otero County	Individual Assistance and Public Assistance (A-G)	$750,000.00	$152,104.94	$902,104.94
Mescalero Apache Reservation	Individual Assistance and Public Assistance (A-G)	$3,687,164.31	$5,573.54	$3,692,737.85
Rio Arriba County	Individual Assistance and Public Assistance (A-G)	$1,959,316.54	$176,732.11	$2,136,048.65
San Juan County	Individual Assistance and Public Assistance (A-G)	$1,629,925.56	$138,437.09	$1,768,362.65
Chaves County	Individual Assistance and Public Assistance (A-G)	$103,145,025.44	$16,038,688.32	$119,183,713.32

Most Impacted and Distressed	$109,742,400.00	$122,855,280.00	$1,231,905.37

Overall Progress Narrative:

Overview
The State of New Mexico received $137,178,000 in Community Development Block Grant Disaster Recovery (CDBG-DR) funding under the Disaster Relief Supplemental Appropriations Act, 2025, enacted on December 21, 2024. These funds support long-term recovery efforts associated with the New Mexico South Fork and Salt Fires (DR-4795-NM) and New Mexico Severe Storms and Flooding (DR-4843), as authorized by Federal Register Notice 90 FR 4759, published January 16, 2025. HUD approved New Mexico's CDBG-DR Action Plan on August 29, 2025, establishing the framework for the implementation of disaster recovery programs administered by the New Mexico Department of Homeland Security and Emergency

Management (DHSEM) in coordination with the New Mexico Department of Finance and Administration (DFA).
During the reporting period, DHSEM continued implementation of the New Mexico Home Recovery Program (HRP) and the Post-Disaster Infrastructure Investment Program (PDIIP). Concurrently, DHSEM advanced development of the Disaster Resiliency Planning Program (DRPP), including program design necessary for future program launch.
DHSEM maintained ongoing coordination with local governments, tribal partners, community-based organizations, and state and federal agencies to ensure recovery efforts remained aligned with priorities identified through the State's Unmet Needs Assessment and stakeholder engagement process. Recovery investments continued to focus on housing recovery, infrastructure restoration, and resiliency planning activities serving HUD-designated Most Impacted and Distressed (MID) areas in Lincoln and Chaves Counties, as well as State-designated MID areas in San Juan County, Rio Arriba County, and the Mescalero Apache Tribe.
New Mexico Home Recovery Program (HRP)
Consistent with the findings of the State's Unmet Needs Assessment, implementation of the New Mexico Home Recovery Program remains DHSEM's highest recovery priority.
During the reporting period, HRP continued advancing from program startup toward active implementation. Program activities focused on applicant outreach, application intake and processing, procurement, environmental compliance, operational readiness, and the refinement of procedures necessary to support long-term program delivery. DHSEM continued strengthening eligibility review, damage assessment, environmental review, and case management processes to position the program for field implementation.
Outreach and Application Intake
DHSEM launched an extensive community outreach initiative that includes public town halls and application assistance workshops within HUD-designated MID areas. Monthly town halls began in July 2026 in Ruidoso and Roswell and provide program updates, answer resident questions, and collect community feedback. Beginning in July 2026, Disaster Case Managers also began conducting application assistance workshops every Tuesday and Thursday in Ruidoso and Roswell, providing one-on-one support to applicants throughout the application process.
Program information, workshop schedules, town hall schedules, and application materials remain available through DHSEM's dedicated New Mexico Home Recovery Program website.
DHSEM also initiated weekly and monthly stakeholder reports to provide local elected officials and community leaders with updates regarding program implementation, outreach activities, a application volumes by jurisdiction.
As of September 30, 2026, the program had received 187 applications, including 56 applications from Lincoln County and 128 applications from Chaves County. Disaster Case Managers continue to assist residents with application completion while staff conduct preliminary eligibility reviews and duplication of benefits analyses. These reviews are conducted in accordance with Section 312 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5155), which prohibits the duplication of federal assistance for losses that have already been compensated from another source.
Environmental Review and Compliance
During the previous reporting period, DHSEM completed Tier I Environmental Assessments for Lincoln and Chaves Counties and published the required environmental review documentation for public comment in accordance with 24 CFR Part 58.
During the current reporting period, DHSEM's Certifying Officer executed Findings of No Significant Impact (FONSIs) for both counties. DHSEM anticipates submitting a Request for Release of Funds (RROF) to HUD and obtaining Authorization for Use of Grant Funds during the next reporting period.
DHSEM also continued coordination with HUD, FEMA, and the State Historic Preservation Office (SHPO) to finalize an addendum to the existing DHSEM-FEMA Prototype Programmatic Agreement (PA). During this quarter, final language was routed to all parties for review and signature.
Additionally, DHSEM continued coordination with FEMA Environmental and Historic Preservation (EHP) staff regarding execution of a data-sharing Memorandum of Understanding (MOU). Many applicants seeking HRP assistance in Lincoln County previously participated in New Mexico's Private Property Debris Removal (PPDR) Program. To avoid duplication of environmental review efforts and streamline project delivery, DHSEM has requested access to site-specific environmental information previously collected through FEMA's EHP review process. This information may support Tier II environmental reviews and environmental review records, helping expedite project implementation while maintaining compliance with NEPA and 24 CFR Part 58 requirements. Execution of the MOU is anticipated during the next reporting period.
Procurement and Readiness
Procurement activities continued throughout the quarter to support transition into field implementation. Requests for Proposals (RFPs) for Damage Assessment Services, Construction Services, and Tier II Environmental Review Services were completed during or prior to the reporting period.
These procurements represent significant progress toward establishing the technical and operational capacity necessary to advance applicants through environmental review, damage assessment, scope development, and construction. DHSEM currently anticipates initiating field operations in December 2026.
Post-Disaster Infrastructure Investment Program (PDIIP)
DHSEM continued implementation of the Post-Disaster Infrastructure Investment Program in accordance with the phased approach established in the State's Action Plan.
During the reporting period, efforts focused on providing technical assistance to eligible applicants developing project proposals, refining program systems, developing proposal evaluation tools, and strengthening administrative procedures necessary to support futurepoject selection, funding, and monitoring activities. Additional implementation efforts included planning for compliance with federal labor standards requirements, including the Davis-Bacon and Related Acts (DBRA) and Section 3.
The project proposal submission period was originally scheduled to close during this reporting period. However, DHSEM extended the deadline to October 3, 2026, to provide applicants additional time to complete submissions. Entities receiving Notices of Incomplete Proposal were granted 15 days to submit missing or corrected documentation identified during DHSEM's completeness review process.
A selection committee is scheduled to review, score, and recommend project proposals during the next reporting period.
Disaster Resiliency Planning Program (DRPP)
DHSEM continued development of the Disaster Resiliency Planning Program in accordance with the State's Action Plan. Activities during the reporting period focused on program design, development of administrative and operational frameworks, and coordination of implementation sequencing with other CDBG-DR programs.
As of September 30, 2026, DRPP remained in the development phase and had not yet opened for project applications or proposal submissions. Program launch remains anticipated in a future reporting period following completion of program development and implementation readiness activities.
Challenges and Mitigation Efforts
During the reporting period, DHSEM continued addressing implementation challenges associated with transitioning from program startup to active delivery while maintaining compliance with applicable federal requirements. DHSEM addressed these challenges through continued process refinement, and development of comprehensive standard operating procedures to promote consistent program administration and regulatory compliance. Through these mitigation strategies, DHSEM continued strengthening the administrative, operational, and compliance framework necessary to support successful long-term recovery while advancing implementation of the State's CDBG-DR recovery programs.
Disaster Impacts and Unmet Recovery Needs
Statewide heavy rain and flooding impacted communities across New Mexico, including in HUD and State-identified Most Impacted and Distressed Communities. Residents and local jurisdictions in San Juan County, Chaves County, and Lincoln County have experienced repeated and compounding damages to homes and infrastructure left vulnerable by the 2024 disaster events. These recurring events have resulted in additional damage to homes, infrastructure, and community assets and have increased long-term recovery needs beyond those identified in the State's original Unmet Needs Assessment. As a result, affected communities continue to require recovery resources beyond those available through the current CDBG-DR allocation.

SAVE System Eligibility Verification
HUD's Universal Notice and the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) require recipients administering CDBG-DR programs to verify applicant eligibility for certain federal benefits through the Systematic Alien Verification for Entitlements (SAVE) Program.
DHSEM submitted an application for access to the SAVE system; however, the request was denied. DHSEM intends to seek clarification from HUD regarding applicable compliance requirements and whether alternative verification methods may be utilized.
Next Steps/Upcoming Activities
During the next reporting period, DHSEM will continue expanding implementation across the New Mexico Home Recovery Program and Post Disaster Infrastructure Investment Program while preparing for launch of the third CDBG-DR funded program, the Disaster Resiliency Planning Program.
New Mexico Home Recovery Program
Priorities during the next reporting period include finalizing and executing contracts for Damage Assessment services, Tier II Environmental Review services, and Construction, and advancing eligible pre-construction program implementation activities. DHSEM intends to submit the Request for Release of Funds (RROF) during the next reporting period. Execution of the HUD Addendum to the existing DHSEM-FEMA Prototype Programmatic Agreement and execution of the FEMA-DHSEM Data Sharing Memorandum of Understanding are also anticipated during the reporting period.
DHSEM will continue resident outreach, application intake, and eligibility determinations. DHSEM will submit the Request for Release of Funds for HUD review and approval. Property-specific environmental reviews and damage assessments will proceed as contracts are finalized and in accordance with applicable HUD environmental review requirements. These activities will inform the development of scopes of work and grant agreements for eligible homeowners as they progress through required program processes.
DHSEM anticipates the start of construction activities in December 2026, contingent upon completion of applicable environmental review and eligibility requirements, HUD approval of the Request for Release of Funds, and authorization of the Authority to Use Grant Funds.
Additional priorities include continued refinement of program procedures, quality assurance measures, documentation standards, and project tracking systems.
Post-Disaster Infrastructure Investment Program
DHSEM will continue advancing program implementation following the anticipated close of the extended project proposal submission period on October 3, 2026. Priorities include the evaluation, scoring, and ranking of project proposals by the Evaluation Committee on November 3, 2026, issuing Notices of Intent to Fund to entities with selected projects, and beginning environmental review activities for selected projects. DHSEM will continue providing technical assistance to eligible entities as appropriate and strengthening administrative processes necessary to support project funding, implementation, and monitoring.
Disaster Resiliency Planning Program
DHSEM will continue program startup activities in preparation to accept project proposals. During the next reporting period, DHSEM will continue program development and implementation readiness activities for the Disaster Resiliency Planning Program.
Across all programs, DHSEM will continue expanding staffing capacity, strengthening interagency coordination, improving operational systems and workflows, increasing obligations and expenditures, and maintaining full compliance with applicable CDBG-DR requirements while supporting long-term recovery and resilience throughout New Mexico.

Activity Description:

The New Construction activity includes construction of new homes provided for disaster-impacted households on properties they already own, provided the site is located outside of the floodplain. While undamaged property owned by the household may be used for new unit placement, the acquisition of new property is not eligible for funding under the New Mexico Home Recovery Program. Newly constructed home configurations will be based on minimum unit size in relation to household size and composition. New Construction activity will be conducted in compliance with all HUD compliance regulations and eligible activity citations listed in the Action Plan.
The budgeted amount assigned to this activity is based on current program cost projections and may be revised.

Total Projected Budget from All Sources	$0.00	$17,893,000.00
Total Budget	$0.00	$17,893,000.00
Total Obligated	$0.00	$17,893,000.00
Total Funds Drawdown	$293,216.46	$293,216.46
Program Funds Drawdown	$293,216.46	$293,216.46
Program Income Drawdown	$0.00	$0.00
Program Income Received	$0.00	$0.00
Total Funds Expended	$0.00	$378,595.18
The State of New Mexico	$0.00	$378,595.18
Most Impacted and Distressed Expended	$0.00	$0.00

Activity Description:

The Mitigation activity encompasses the Mitigation Set-Aside that is specifically designed to target homes located in floodprone areas, wildfire-impacted zones, and other high-risk locations identified through FEMA and state hazard assessments. The Mitigation activity includes mitigation measures (e.g., defensible space for wildfire zones, elevation for flood-prone homes) integrated into the primary rehab/reconstruction scopes of work whenever technically feasible and cost-effective. The objective of the Mitigation Set-Aside is to apply cost-effective, site-specific mitigation strategies during the construction or repair of disaster-damaged homes. These measures are selected based on property location, type of hazard exposure, and feasibility within the scope of the project. All activities funded through the Mitigation Set-Aside must be compliant with HUD requirements and support long-term risk reduction.

Location Description:

Activity Progress Narrative:

Consistent with the findings of the State's Unmet Needs Assessment, the New Mexico Home Recovery Program remains DHSEM's highest recovery priority. During the reporting period, DHSEM advanced active implementation through expanded outreach, application intake and processing, environmental compliance activities, procurement, and operational readiness efforts. Community engagement increased through monthly town halls and twice-weekly application assistance workshops in Ruidoso and Roswell, while Disaster Case Managers continued supporting applicants through the intake process. As of September 30, 2026, the program had received 187 applications and continued conducting eligibility reviews and duplication of benefits analyses.

DHSEM also achieved key environmental review milestones, including execution of Findings of No Significant Impact (FONSIs) for Lincoln and Chaves Counties. Coordination with HUD, FEMA, and SHPO continued through finalization of an addendum to the existing DHSEM-FEMA Prototype Programmatic Agreement (PA). Additionally, DHSEM continued coordination with FEMA Environmental and Historic Preservation (EHP) staff regarding execution of a data-sharing Memorandum of Understanding (MOU).

Activity Description:

The Public Infrastructure Rehabilitation activity encompasses applicant awards under the Post-Disaster Infrastructure Investment Program for Public Infrastructure Rehabilitation projects selected for award by DHSEM.
DHSEM intends to open applications for the Post-Disaster Infrastructure Investment Program in the Spring of 2026. The budgeted amount assigned to this activity is based on current program cost projections and may be revised.

Location Description:

Activity Progress Narrative:

During the reporting period, DHSEM continued implementation of the Post-Disaster Infrastructure Investment Program (PDIIP) in accordance with the phased approach established in the State's Action Plan. Activities focused on providing technical assistance to eligible applicants developing project proposals, refining program systems, developing proposal evaluation tools, and strengthening administrative procedures to support future project selection, funding, and monitoring. DHSEM also continued implementation readiness efforts by preparing for compliance with federal labor standards requirements, including the Davis-Bacon and Related Acts (DBRA) and Section 3. To accommodate applicant needs and support complete submissions, the project proposal deadline was extended to October 3, 2026, and applicants receiving Notices of Incomplete Proposal were provided an opportunity to submit missing or corrected documentation. A selection committee is scheduled to review, score, and recommend project proposals during the next reporting period.
